## ABOUT

**AI Developer** skilled in implementing ML models and algorithms, developing chatbots and FineTuning LLMs. Experienced in full-stack web development, microcontroller programming and IoT with Arduino, AVR, and WiFi modules.

Interested in **Agentic AI** and passionate about **NLP** methods and **LLMs**, with a strong focus on **self-driven projects** and **continuous learning**.

Eager to apply my knowledge to create innovative solutions in machine learning and AI.

---

## PROJECTS

**2025**

### Book Query

- Uses Langchain to process and find similar books by vector search
- Uses ChromaDB to store and search books
- Uses FastAPI to serve the model
- Uses gpt-4o & Openai Embedding models
- Demo available [Here](#)

**2024**

### HandPaint

- Captures webcam images using OpenCV and applies image processing
- Detects hand gestures with MediaPipe

### ManshoorAI

- FineTuned GPT2 using HuggingFace
- Used Tensorflow & Keras to implement language model and generate poem
- Supports different inference methods (Top-K, Random Sampling, Greedy)
- Includes a web interface for user interaction
- Demo available [Here](#)

**2022**

### WiFi smart switch

- Allows remote control of a smart switch via a mobile app
- Uses a WiFi module and Arduino for server setup
- Supports mDNS for network discovery
- Provides QR code for easy connection
- Demo available [Here](#)

### YekTik

- Offers a React-based web interface for task management.
- Includes a fast back-end built with Python and Flask
- Demo available [Here](#)

**2016**

### AtreSaba

- An app to provide Persian poems for reading and downloading
- Uses the Ganjoor online library
- App available [Here](#)

More projects on my portfolio [Here](#)

---

## SKILLS

### AI / ML

**Familiar with** NLP concepts, LLM models, FineTuning using Hugging Face(PEFT/LoRA), ChatBot and RAG implementation using LangChain

**Implemented ML algorithms:** SVM, KNN, PCA, K-Means, Decision Tree and Neural Networks

### ML Frameworks and Tools:

**Advanced:** LangChain, TensorFlow, Keras, ScikitLearn

**Intermediate:** OpenCV, Pandas, Numpy

**Familiar with:** Pytorch, NLTK, mlflow

### Other Tools

Git, Docker, RabbitMQ

### Programming Languages

Javascript (Advanced)

Python (Advanced)

Java (Intermediate)

C/C++ (Intermediate)

### Soft skills

Creativity, Responsibility, Teamwork, Problem-Solving

---

## CERTIFICATES

- Machine Learning Specialization ([Stanford & Coursera](#)), 2022
  - Tensorflow Developer Professional ([Coursera](#)), 2022
  - Advanced Computer Vision with Tensorflow ([Coursera](#)), 2023
- 

## EDUCATION

**KHU**, Iran - MSc. Artificial Intelligence (Withdrawal) 2018 - 2021

**QUT**, Iran - BSc. Hardware Engineering 2012 -2017
